

**SKY RANCH/LOWRY SERVICE AREA RESIDENTIAL SYSTEM DEVELOPMENT CHARGES**

**Single Family Detached System Development Charges**

<b>Article</b>	<b>Fee/Charge</b>	<b>Amount</b>
12	Water System Development Charge	\$33,204 per SFE based on 0.33 acre-feet of water demand per year
17	Wastewater System Development Charge	\$8,000 per unit

Water System Development charges are based on a “Water Budget” methodology, which calculates projected water demand for each residential lot based on lot size, house size, impervious area, and irrigated lawn area. The “Single Family Detached Example” shown below calculates Water System Development Charges for two Single Family Equivalent (SFE) amounts based on various lot and home sizes.

**Single Family Detached Example**

<b>Component</b>	<b>1.0 SFE Amount*</b>	<b>0.91 SFE Amount**</b>
Total Water System Development Charge	\$33,204	\$30,216
Wastewater System Charge	\$8,000	\$8,000
<b>Total Water &amp; Wastewater Tap Fee</b>	<b>\$41,204</b>	<b>\$38,216</b>

SFE = Single Family Equivalent

\* Assumes 0.33 acre-feet of annual water usage

\*\* Assumes 0.30 acre-feet of annual water usage

**SKY RANCH/LOWRY SERVICE AREA RESIDENTIAL MONTHLY SEWER CHARGES**

<b>Fee/Charge</b>		<b>Amount</b>
Sewer Consumption Charge		\$9.28 per 1000 gallons
Monthly Sewer Service Charge		\$9.35 per tap

\* Monthly sewer generation is assumed to be equal to the average potable water consumption in the months of December through February. Monthly sewer generation is recalculated once per year at the beginning of March and is set at this monthly usage rate for the following year. New accounts without historical water consumption data will be assessed a usage of 4,500 gallons per month until their account records actual potable water consumption from December through February. Minimum monthly sewer generation will be set at 2,000 gallons per month.

**SKY RANCH/LOWRY SERVICE AREA NON-POTABLE IRRIGATION SYSTEM DEVELOPMENT CHARGES**

System development fees for irrigation off of the District’s non-potable lines are calculated based on the table shown below. Development fees for water conserving irrigation systems that utilize rain sensors, timers, water efficiency sprinkler heads, or drip systems will be assessed at the lower rate. Irrigation taps to establish native grasses and plantings will not be assessed a tap fee; however, these taps will be limited to a maximum three-year time period. Instead of paying a tap fee, the owner/applicant will pay a deposit depending on the size of the irrigation system. Prior to the three-year mark once vegetation establishment has occurred, the deposit will be returned to the owner following the disconnection of the non-potable tap from the water main. All connections and disconnections of temporary taps to the irrigation system will be at the sole cost of the applicant/owner.

<b>Irrigation Tap Fee Type</b>	<b>Tap Fee Amount</b>
Non-Water Conserving Irrigation Tap	\$4.63 / square foot of irrigated area
Water Conserving Irrigation Tap	\$1.68 / square foot of irrigated area
Vegetation Establishment Tap	Refundable Tap Deposit
